

AD Series

Intermediate Proofer

TSEK CE PG

- Intermediate proofer: depending on capacity, various types of infeed systems can be utilized such as single claw infeed, double claw infeed and double conveyor infeed
- Number of pockets and trays vary depending on the intermediate proof time required
- Proofer trays available in 7, 8 or 10 pockets across consisting of rectangular nylon-mesh pockets
- The pockets and trays are easily removable for sanitation and maintenance
- Automatic discharge of the dough pieces onto a teflon chute or cross-conveyor
- Infeed system is available with right or left and front or back options
- Easy speed adjustment through inverter control
- Welded rugged tubular steel construction

OPTIONAL

- Custom production availability of different models depending on the capacity
- Teflon-coated dough infeed and transfer components
- Stainless-steel side panels
- Stainless-steel frame
